Developed and deployed an end-to-end Smart Crop Advisory System
integrating data science models with a web interface.
Projects **Smart Crop Advisory System** (Duration June 2026 - June 2026)
A Smart Crop Advisory System is a digital platform that converts complex
environmental, biological, and market data into actionable advice for
smallholder farmers. Because small and marginal farmers operate on tight
budgets and small plots of land, this system focuses on maximizing yield,
minimizing waste, and reducing financial risk.
